The most attractive and at the same time the most exotic animal of Turkey is definitely the Anatolian ibex Bezoar Ibex. Our hunting areas are located in the Taurus Mountains at an altitude of 1,500 to 2,500 meters above sea level. It is these areas that boast the strongest Anatolian ibex trophies, which can be over 125 cm. The Bezoar Ibex is a very alert and shy animal, very vital and can easily overcome long distances in difficult rocky terrain. Therefore, the requirements for shooting are usually above a distance of 250 meters. Despite the fact that we will try as much as possible to use the transport with a 4x4 off-road vehicle, a good physical preparation of the hunter is also required. The most ideal period for hunting Bezoar Ibex is from 01. December to 15. December. The arrival is at the airport in Antalya and from there the transfer takes about 2 hours to the place of accommodation, which is located less than 30 minutes into the heart of the beautiful Taurus Mountains.
