

**Praktijk 'A.E. Stoltenkamp'**

*The team of Physiotherapy Stoltenkamp consists of six therapists. Together they offer different specializations including: physio therapy, manual therapy and sports physiotherapy.*

# UNPLEASANT ODOURS REMOVED FROM THE FITNESS ROOM

**Physio practices often have a training room where medical fitness is applied. People come together here to do physical exercises. This causes the necessary odours. A clean and fresh environment is not only much more pleasant for patients but also for the employees.**

In addition, the air quality for COPD patients is extra sensitive. With COPD, the lungs are inflamed and damaged with tightness of the chest and coughing as a result.

**THE CHALLENGE**

At Physiotherapy Stoltencamp are six therapists present with specializations such as: Physio therapy, manual therapy, Sports Physiotherapy, COPD, asthma, Lymphatic drainage, ultrasonic, Shockwave, medical training therapy and cardiac rehabilitation.

The practice has an extensive fitness center, where they offer patients medical fitness under supervision. Some people have a naturally body odour, but with more physical effort this gets even worse. Sweat odour, but

for example also food smells, strong perfume or scent of tobacco. This all together can be very unpleasant.

Physiotherapy Stoltenkamp was looking for a solution. Previously, the area only had a

small fan, which was not sufficient for good air cleaning. Mr. Stoltenkamp went looking around and found the website of Euromate.

## VISIONAIR<sup>2</sup> BUILT-IN

Euromate's VisionAir air cleaner improves the indoor air quality significantly. In addition, the air is recirculated. Polluted indoor air is purified and clean air is pumped back into the room. This means that no valuable heated or cooled air is lost.

### Features of the VisionAir:

- Clean and healthy working environment
- Easy to install in the ceiling, without major construction work
- Low noise level
- User-friendly and remote operated
- Energy-saving
- More efficiency from an airco
- An air cleaner is complementary to existing air treatment such as mechanical ventilation or air conditioning

The VisionAir fits in any interior thanks to its stylish design. In addition, the air cleaner has a low noise level and is very user-friendly. As standard the air cleaners of Euromate are equipped with FreeBreeze cups which add an aromatic freshness to the room.

“

*It was exactly what I wanted. We had to dispose quickly of an air cleaner which is why I was very satisfied about the action speed.*

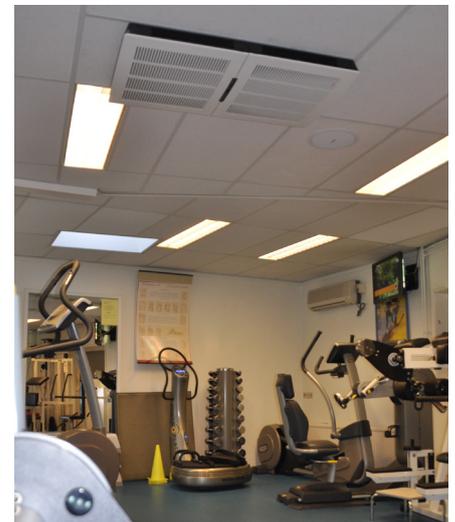

*Quote: Mr. A.E. Stoltenkamp, owner Practice 'A.E. Stoltenkamp'*

### THE SOLUTION

An adviser from Euromate visited Mr. Stoltenkamp and recommended a VisionAir<sup>2</sup> CarbonMax air cleaner that could be built-in easily without chopping or breaking work in the ceiling. With the included remote control the air cleaner can be operated easily.

The CarbonMax is a large active carbon filter that removes harmful substances and unpleasant odours. Thanks to the large filter surface a large area can be cleaned.

*Mr. Stoltenkamp:* "The air cleaner is always switched on. We are dealing with a number of peaks per day in the fitness area, in terms of visitors. In that case we put the air cleaner higher, so the odours are removed quickly. The operation is easy and it does not smell anymore. *He continues:* "We wanted to quickly dispose of the unit. Euromate acted very quickly and efficient during the quotation and installation process, which was very nice!"

### PRODUCT FACTS

#### Products

- 1x VisionAir<sup>2</sup> CarbonMax

#### Application

- Fitness area Physio practice for the purpose of unpleasant odours

#### Maintenance

- 2 times per year
