

Coordinators meeting

Travelling Raises an Inclusive Partnership

1. Ms Ladňáková welcomed all the members of the team and started the meeting. She reminded that every country is supposed to prepare one day trip for the group of 25 people who are disadvantaged - it could be disadvantaged students or seniors and the students have to prepare itinerary for this trip and they have to plan the journey, the date and the time, km. The template is available on google drive. The deadline is till the end of December.
2. Miss Ladňáková will prepare a mobility tool of this Italian mobility with the whole description and the task for every member of TRIP team is to put their participants into this platform.
3. Another obligatory thing is dissemination. So on Google Drive every country has to upload all the material such as photos, videos descriptions of seminars and more about our trip mobility.
4. A guide of UNESCO heritage from Turkey has to be done till the next mobility in Lithuania. In this guide there should be about four monuments and approximately five lines to each of the monuments in Turkish language but also in English. The guide of UNESCO heritage from Italy has to be done as well by the Italian partner till 30th of November 2021. The guide of UNESCO heritage should be uploaded into Google Drive and all the countries have to translate it into their national languages till end of the year 2021.
5. Handbook for tourist guide is at the moment in the process and it will be done by the end of the year so till the end of December and the first two chapters will be prepared by Slovak team.
6. Dictionary is prepared on Google Drive and every country has to translate those terms into their own languages.

7. Itinerary has to be prepared for each single mobility so Turkey and Italy both have to prepare itineraries and have to upload them and they should not forget to put kilometres in.
8. Video from Italian mobility should be prepared before the Lithuanian mobility so Maria needs to upload this video into YouTube channel for TRIP. Italy also needs to upload all the presentations of students, all the videos and photos into Google Drive output - presentation (format PDF) and this is the task for all other countries as well!
9. Lesson plan about Italian UNESCO heritage has to be done and implemented into school curriculums until Lithuanian mobility.
10. As far as Turkish team is not presenting, they have to prepare a video on topographic preparation and upload it on google drive.
11. The main dissemination event will be a mini fair - one per each country so right now every country should be thinking about how to prepare this mini fair, how to manage it, who will be involved (tourism organisation...?)
12. All the partners agreed on the following dates of mobilities: Lithuania 21st of November till 27th of November, Spain 6th of February till the 12th of February, Poland from 20th of March till the 26th of March and Slovakia from 2nd of May till the 8th of May.
13. For the next mobility in Lithuania all the participating students have to prepare a presentation about sport and adventure tourism in their own countries.
14. Miss Ladňáková as the coordinator is going to prepare a Word document with all the things that should be involved in the programme for Lithuanian mobility.
15. Lithuanian team should contact a travel agency about giving a presentation or lecture on sport and adventure tourism with at least two UNESCO heritage sides. The travel agency will present this to all the participating countries and the Lithuanian team should also prepare a video about their UNESCO heritage. The lecture and workshop in Lithuania will be provided by the coordinator-Miss Ladňáková.
16. Italian team is responsible to write a report after mobility in Italy.

**Place:** Italy, Afragola**Date:** 6th of October 2021**Time:** 9:30

17. During the discussion we were talking about Turkish team and that they need to find out from their national agency how to manage the budget because their students weren't travelling. But because they were online, Corina needs to mark down those who were online.
